

### REASONS TO CONSIDER

#### Targeted Exposure

Pureplay access to uranium mining and the production of nuclear components.

#### Emerging Energy Opportunity

Global initiatives to reduce carbon emissions will see uranium and nuclear adoption rise as a crucial power source to facilitate the clean energy transition.

#### Competitive Supply Dynamics

The case for uranium today is perhaps the strongest it's been in a decade driven by increasing global demand and nuclear power capacity.

### KEY INFORMATION

As of 28 March 2024

Exchange Code	ATOM
IRESS	ATOM.AXW
ISIN	AU0000249336
Issuer	Global X Management (AUS) Limited
Domicile	Australia
Base Currency	Australian Dollar
Currency Hedged	No
Inception Date	05 Dec 2022
Mgt. Fee (% p.a.)	0.69
Fund Size (\$mn)	23.8
NAV per Unit (\$)	15.33

\*Calculated on the Net Asset Value (NAV) of the Fund. All fees and costs are inclusive of GST. Refer to the PDS for a complete list of fees and costs.

**INDEX DESCRIPTION**

The Solactive Global Uranium & Nuclear Components Total Return Index is designed to track the performance of companies that have or are expected to have business operations or exposure in the uranium industry.

The index is rules-based and classifies eligible companies as either ‘pure-play’ or ‘non-pure play’. ‘Pure-play’ includes companies for which a significant part of the business operations is or is expected to be related to the uranium industry (in particular uranium mining, exploration for uranium, and technologies related to the uranium industry). ‘Non-pure play’ applies when a large portion of a company’s revenue is related to the uranium industry. Constituents must pass a verification process which checks publicly disclosed information to ensure there is revenue source transparency. A controversial weapon screen removes companies involved with nuclear weaponry such as nuclear weapons and depleted uranium, to mitigate unsystematic risks. The index is weighted by ranking eligible companies on the lower of either their free float market capitalisation or their average daily trading value multiplied by 2000. Individual pure-play companies can have a maximum weighting of 22.5%. The total index allocation to pure-play companies with an individual weight of 5% or more is capped at 47.5%. All subsequent pure-play companies are capped at 4.75% or below. Individual non-pure play companies can have a maximum weighting of 2%, with a maximum of 15 companies to be included in the index. The index follows a quarterly rebalancing schedule, made on the last business day of January, April, July and October. Eligible companies must have:

- Free float market capitalisation of at least \$50 million if they are not current constituents and at least \$30 million if they are current constituents.
- Average daily trading volume of at least \$100,000 over the last three months if they are not current constituents, and \$50,000 for existing constituents.
- Listing on a regulated stock exchange in the form of shares tradable for foreign investors without restrictions.

**PORTFOLIO STATISTICS**
