PRODUCT DESCRIPTION

EETH tracks the performance of the price of ether in Australian dollars before fees and expenses. It provides holders with an interest in physical ether held in cold storage by Coinbase. EETH units are redeemable for ether. For top security, private keys to our digital wallets are broken into pieces – a practice called “sharding”. They are then held offline in military-grade vaults, out of the reach of hackers. Moving ether to and from EETH requires multiple signatures. In this way, EETH provides investors with an arguably more secure way of trading and owning ether than what is available on unregulated crypto venues.
