INTRODUCING ETPMPT

ETPMPT invests in physically allocated platinum which is vaulted in London on behalf of holders. It aims to offer a return equivalent to the movements in the Australian dollar price of platinum, less the annual management fee.

DID YOU KNOW?

- Platinum has been used in cancer treatment for more than 40 years¹.

HOW ETPMPT WORKS

- ETPMPT is an exchange traded product that trades on the stock exchange just like a share and is settled and held in ordinary brokerage accounts.
- Each ETPMPT share entitles the holder to an amount of physical platinum held by the custodian, JPMorgan Chase Bank, N.A. in London.
- The platinum adheres to global platinum quality standards as per the London Platinum and Palladium Association's (LPPM) rules for Good Delivery.
- Each physical bar is segregated, individually identified and allocated which means there is no credit risk to the custodian.

HOW TO USE ETPMPT IN A PORTFOLIO

- ETPMPT can enhance a portfolio's overall risk/return characteristics through diversification.
- It can be used as part of the alternatives allocation in a portfolio.
- As a growth exposure in relation to industrial demand in automotive manufacturing, technology and medical industries.

KEY FEATURES

Diversification from traditional asset classes.

Exposure to the supply and demand dynamics for platinum in areas such as the automotive industry, technology and medical industries.

Easy to use and low-cost access compared to physical possession and storage of platinum.
