

REASONS TO CONSIDER

Support Clean Energy

Structural tailwinds which are backed by government and corporate clean energy transition initiatives.

Critical Resources Exposure

Diversified exposure to the materials sector with strategic allocations to green metals such as lithium, copper, nickel and cobalt.

Growth Potential

Surging demand for green metals and impending supply crunches are set to spark potential growth.

INDEX DESCRIPTION

The BITA Global Green Energy Metals Index (the "Index") tracks a global basket of companies which extract, process and trade metals and minerals which the International Energy Agency (IEA) has deemed to be critical for the clean energy transition.

The index is rules-based and requires at least 50% of a company's revenue to be derived from green metals. It also exercises a series of environmental criteria to identify companies practicing reasonable industry standards. A modified free float market capitalisation algorithm is used to determine weightings – noting a maximum allocation of 7%. The number of stocks associated with each commodity is capped at ten to ensure diversification across the range of minerals. Rebalancing occurs semi-annually.

PORTFOLIO STATISTICS

Number of Holdings	46
Median Market Cap (\$bn)	6.8
P/E Ratio [^]	19.8
P/B Ratio [^]	1.6
