INDEX DESCRIPTION

The index is designed to track the performance of companies listed or incorporated in developed markets that are positioned to benefit from the development and utilization of Artificial Intelligence (AI) in their products and services, as well as companies that produce hardware used in AI applied for the analysis of Big Data.

Indxx has identified the following categories as providing exposure to the underlying theme:

Category 1

- Artificial Intelligence Developers – develop AI and use AI in their own products
- Artificial Intelligence-as-a-Service (“AlaaS”) – provide artificial intelligence capabilities to their customers as a service.

Category 2

- Artificial Intelligence Hardware - produce semiconductors, memory storage and other hardware that is utilized for artificial intelligence applications.
- Quantum Computing - develop quantum computing technology.

The top 60 companies from Category 1 and the top 25 companies from Category 2 will form the final index. Each component with an Exposure Score >20% is subject to maximum weight of 3%, components with Exposure Score <20% have a maximum weight of 1%. The index is rebalanced, and distributions are paid semi-annually.
