

### REASONS TO CONSIDER

#### High Income Potential

QYLD seeks to generate income through covered call writing, which historically produces higher yields in periods of volatility.

(note: past performance is not a reliable indicator of future performance)

#### Efficient Options Execution

QYLD writes call options on the Nasdaq 100 Index, saving investors the time and potential expense of doing so individually.

#### Potential Downside Mitigation

The premiums QYLD generates may partly cushion drawdowns.

### KEY INFORMATION

As of 28 March 2024

Exchange Code	QYLD
IRESS	QYLD.AXW
ISIN	AU0000251886
Issuer	Global X Management (AUS) Limited

Meta Platforms Inc	4.9	Costco Wholesale Corp	2.4

**INDEX DESCRIPTION**

The Cboe NASDAQ-100 BuyWrite V2 Index is designed to represent a proposed hypothetical buy-write strategy. The “long” NASDAQ-100 Index component and the “short” Covered Call Option component are held in equal notional amounts.

**NASDAQ-100 Index Component:**

- Comprised of the constituents of the NASDAQ-100 Index, which measures the total return of 100 of the largest domestic and international non-financial companies listed on The Nasdaq Stock Market based on market capitalisation.
- Follows the weighting scheme that governs the NASDAQ-100 Index.
- Reconstituted annually on the third Friday of December, as per the NASDAQ-100 Index annual rebalance schedule. If at any time during the year, a constituent no longer meets the Continued Eligibility Criteria, or is otherwise determined to have become ineligible for continued inclusion, it is replaced with the largest market capitalisation issuer not currently in the Index and meeting the Initial Eligibility criteria.
- Rebalanced quarterly on the third Friday of March, June, and September, as per the NASDAQ-100 Index adjustment schedule.

**“Covered Call” Option Component:**

- The option position is liquidated at a VWAP price a day prior to its expiration, generally the Thursday preceding the third Friday of the month. VWAP, or the Volume Weighted Average Price is a trading benchmark that provides the average price a security has traded at throughout the day, based on both volume and price.
- After the settlement of the expiring call option, a new at-the-money call option expiring in the next month is then written, a transaction commonly referred to as a “roll”.
- The strike price of the new call option is the closest listed strike price above the last value of the NASDAQ-100 Index reported before 11:00am New York, Eastern Time.

**PORTFOLIO STATISTICS**

Number of Holdings	102
